DESIGNER: Ruth Alvarez

Once you have the final proof, please date and sign the Approval Form and we may begin production. The color tones are selected from the Universal Pantone Coated Grid, which serves as base during production, and there is up to 10% range of difference once the color are transferred onto the cloth.

If there are any changes necessary to the Final Proof, we will need them in writing and dated to avoid any confusions. Chages to the Final Proof willdelay the start of production. When solliciting changes we will need specific details on the changes of Color, Logos, Text and Location. Please take into consideration that paper print outs are going to vary from you monitor. We are not responsible for errors of change after you final approval.
